About Me

I am a Computer Science undergraduate (6th semester) with a good academic record and a growing interest in Machine Learning and Web Development. Familiar with HTML, Tailwind CSS, and basic deployment. Currently exploring foundational concepts in Machine Learning and Statistics. Curious and learning how machine learning models work the way they do. I enjoy the moment when data starts to make sense. Motivated to explore, build, and grow beyond academics.

Skills

- Python, C++
- HTML, Tailwind CSS
- Javascript
- Machine Learning
- Statistics
- Github

Education

BS Computer Science

(2022-2026)

CGPA 3.71

University of Okara, Renala Khurd

Experience

Front end developer - 06/2024 to 09/2024

Bytewise Limited

- Developed responsive web applications using HTML, Tailwind CSS, and a little JavaScript to enhance user experience.
- Built small web features using JavaScript, like a background color changer, and explored tools like Vite and React for hands-on practice.
- Built a website clone to practice structure and layout using HTML and Tailwind CS, deployed the final version using Vercel for online access.
- Practiced basic version control using Git and GitHub, including committing and uploading project code.

Academic coursework

- Studied basic subjects including PF, OOP, and Statistics.
- Worked in VS Code and Jupyter Notebook for coding and practice.
- Practiced analyzing real-world datasets to find insights, and explored the mathematics behind machine learning models to understand how they work.
- Collaborated with fellows to practice programming and shared learning.
